

Ideation Phase Empathize & Discover

Date	28 June 2026
Roll no	23A51A1259
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	2 Marks

Empathy Map Canvas:

An empathy map is a visual tool used to understand the needs, thoughts, feelings, behaviors, and expectations of metro passengers. It helps identify the challenges users face while booking metro tickets, such as long waiting queues, manual fare calculation, delays in ticket generation, and the lack of a convenient digital booking system. By understanding the user's perspective, developers can design solutions that address real customer problems and improve the overall travel experience.

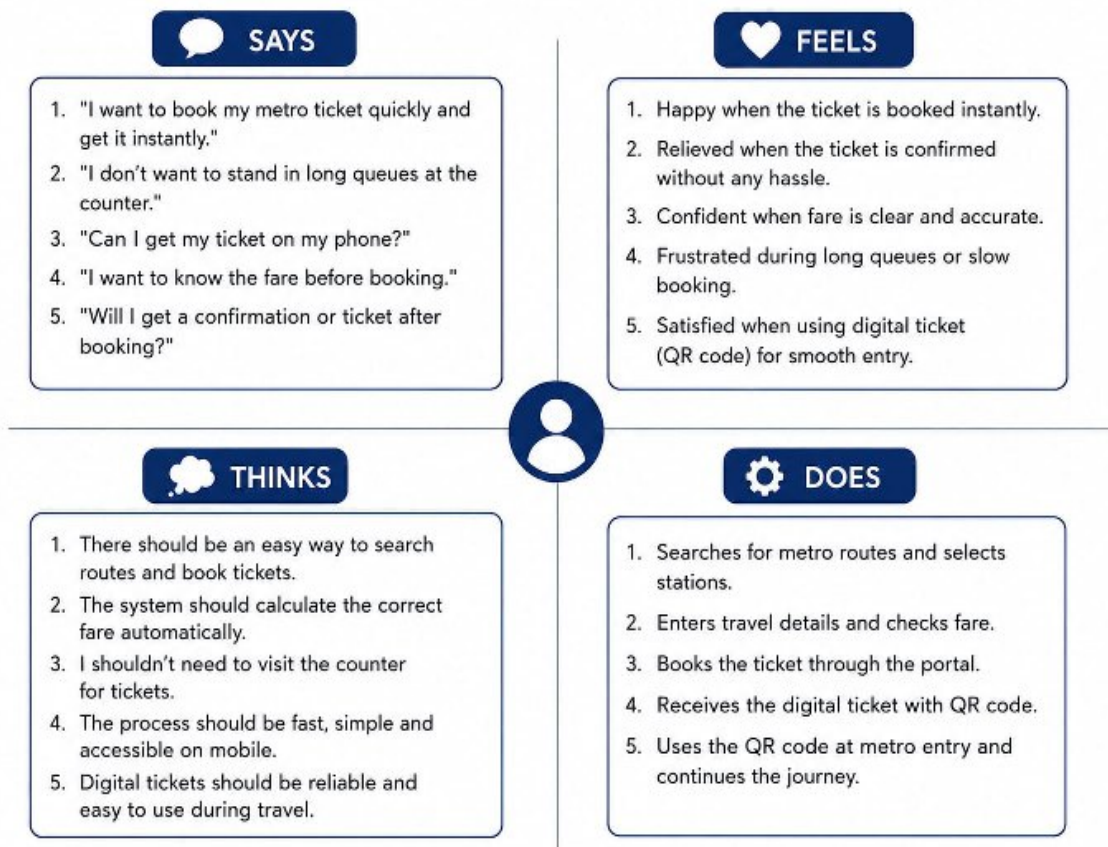

The Metro Ticket Generating System in ServiceNow is designed to provide a fast, secure, and automated ticket booking process through online ticket requests, automatic fare calculation, QR- code- based ticket generation, and instant notifications. This user- centered approach enhances convenience, reduces manual effort, improves operational efficiency, and ensures a seamless, reliable, and satisfying experience for both passengers and metro administrators.

Uses of an Empathy Map

- Understands the needs of metro passengers.
- Identifies problems in the ticket booking process.
- Helps understand the passenger's point of view.
- Supports designing a simple and user- friendly ticket booking system.
- Improves the digital ticket booking experience.
- Helps develop a faster and more efficient metro ticket generation system.

EMPATHY MAP

Metro Ticket Generating System in ServiceNow

PAINS

- Long waiting queues at metro ticket counters.
- Manual ticket booking process.
- Delays in fare calculation and ticket generation.
- No instant digital ticket or QR code.
- Difficulty tracking ticket booking status.
- Time- consuming and inconvenient booking experience.

GAINS

- Simple online metro ticket booking.
- Automatic fare calculation.
- Instant QR- code- based digital ticket generation.
- Quick booking confirmation through notifications.
- Reduced waiting time and manual effort.
- Faster, secure, and user- friendly ticket booking experience.
